

Partnership HealthPlan “Healthy Kids Program” Behavioral Health Information Sheet

Partnership HealthPlan of California (PHC) has teamed with **United Behavioral Health (UBH)** to provide and manage behavioral health care benefits for Partnership **Healthy Kids** enrollees.

As a primary care physician, you have a unique opportunity to help identify mental illness and substance abuse concerns and make psychiatric referrals. In doing so, you can be your patient’s best advocate for the treatment of these illnesses. UBH is committed to supporting primary care physicians in identifying, treating, and referring patients with behavioral health disorders. PHC and UBH believe that the effective coordination of treatment is essential in maintaining high quality of care.

- **You do not need to contact UBH for prior authorizations**
You or your office staff can refer Partnership Healthy Kids enrollees directly to a UBH psychiatrist or other behavioral health professional. The behavioral health professional or patient can obtain an open authorization.
- **A directory of behavioral health clinicians for the Partnership Healthy Kids population can be accessed on the UBH Clinician website (www.ubhonline.com).**
Select “Our Network” on the left side of the home page, then “clinician directory”. You and your patients can also contact UBH directly for assistance by calling the number on the back of the member’s insurance card.
- **UBH shares your dedication to improving the mental health and well-being of your patients.**
Together we can ensure that your patients receive the full range of behavioral health services available to them.

**To refer a Healthy Kids member to behavioral health services, call:
(800)718-8430**
