

Provider Notice: #0041

Date: 4/5/05

Subject: Administration Fee for RSV-IgIV (Respiratory syncytial virus immune globulin) (Also known as Synagis) Effective 9/1/04

Effective September 1, 2004, providers can be reimbursed by PHC an administration fee for RSV-IgIV, codes 90378 and 90379. Providers must bill using the appropriate code, 90738 or 90379, with modifier TS (Follow-up service). The TS modifier will trigger the reimbursement for the \$9.00 administration fee only. Claims billed with the code and no modifier will deny if there is no PHC approved TAR on file.

The Medi-Cal/PHC reimbursement for the codes 90378 and 90379 without the modifier, include the drug and the administration fee. The drug requires a PHC approved TAR.
