

Provider Notice: PN0043

Date: September 1, 2005

**Subject: Menactra (Meningococcal) Immunizations.
Effective 7/1/2005**

Effective 7/1/05, PHC will implement the following reimbursement for Menactra (Meningococcal) immunizations. We believe that the Medi-Cal program will be following this same information. If we learn later that Medi-Cal has made different arrangements for reimbursement, we will notify you of the change.

Under the CHDP program:

For those children ages 11 years through 18 years and eleven months, the CHDP code 69 (Meningococcal Conjugate Vaccine, VFC) would reimburse for the administration of the vaccine. The administration reimbursement under CHDP is \$9.

For those children ages 19 years through twenty years and eleven months, the CHDP code 70 (Meningococcal Conjugate Vaccine, non-VFC) would reimburse for the administration fee as well as the vaccine at the rate of \$101.84.

The code to be used for services not provided under the CHDP program should be 90734. The reimbursement will be \$101.84 when the vaccine is not obtained through the VFC program. When the VFC vaccine is used the reimbursement under this code will be the \$9 for the administration of the vaccine.

If you have any questions, please contact your PHC Provider Relations Representative (707) 836-4100 or the Claims Customer Service Representatives (707) 836-4130.
