DIAGNOSIS CODING TIP OF THE WEEK:

When coding for Allergic Rhinitis use the codes from the category 477. There needs to be a 4th digit with this code to specify if the rhinitis is due to pollen (0), food (1), animal hair or dander (2), other allergen (8) or cause unspecified (9). Do not use code 995.3 since this code is for an allergic reaction or hypersensitivity which is unspecified, such as a localized reaction to a bug bite.
