Improving the Health of Homeless Populations Through Innovation and Collaboration
Share and Learn: Storyboard Application

December 16, 2016

Share your success! Develop a Storyboard to introduce your social determinants of health (SDH) project to fellow participants!

Partnership HealthPlan is pleased to host Improving the Health of Homeless Populations Through Innovation and Collaboration, a conference focused on promoting collaboration and innovation around the topic of homelessness in healthcare. In light of the theme of the conference, we are inviting our attendees to share their work impacting the homeless population through a storyboard, to be displayed at the conference for others to view.

Storyboard Purpose: To introduce your SDH project to fellow participants. The information should serve as prompts for team members to provide a verbal summary presentation of the project and initiate discussion during designated times during the conference.

Storyboard Required Elements:

1. Organization Name and Team Contact Information  
2. Information about your health center/organization (100 words max)  
3. Goal & Mission Statement  
4. Brief project description, including target population (200 words max)  
5. Project impact or lessons learned (please provide data, if possible)  
6. Why is this project important now?

Each storyboard must be approximately 24 x 36 inches in size. Please bring an easel to display the storyboard.

Storyboard Handout: In addition to your storyboard, please bring copies of a one-page (8 ½” X 11”) handout (can be one or two-sided) of your Storyboard to share with fellow participants. Consider this the written form of an “elevator speech.” If you only had 3 – 5 minutes to share the most important elements of your project with someone, what would they be? Please include a digital copy of this handout with your application for distribution to remote attendees.

Application is due 5 p.m. November 18, 2016.

Please complete page 2 to provide us a brief description of your project. Feel free to attach additional pages if necessary. Please submit both the application and handout to kgoelz@partnershiphp.org.
