

Community Information Security Updates

Compliments of Partnership HealthPlan of California

The health care security landscape continues to evolve. Threat actors are showing up in different dimensions of technology every day. This flyer is intended to share a few trusted tools available to your organization to support a continued focus on your security posture.

Health & Human Services Healthcare and Public Health Sector Cybersecurity Gateway

DAP - The Digital Access Project aims to help those who do not have the digital literacy skills they need to succeed and help them understand the relevance the Internet has in their lives. Whether it's finding a job, helping their children complete homework for school, or accessing e-commerce, electronic medical records and connecting with distant family, it is vital that we encourage every person with a disability to take advantage of the tools they need to succeed.
