Partnership HealthPlan of California (PHC) Regions

Mission

To help our members,
and the communities we
serve, be healthy

Vision

To be the most highly
regarded managed care
plan in California

Objectives

At the end of this activity, you will be able to:

- Provide an overview of clinical measure background, specifications, and performance threshold definitions for the 2023 QIP PCP *Controlling High Blood Pressure* measure.
- Examine disproportionate prevalence and/or rates of hypertension across PHC regions and populations and how culture and lifestyle factors (i.e. diet) of groups experiencing risk may contribute to ineffective management.
- Review documentation requirements, including those related to telehealth updates and remote blood pressure monitoring, to maximize adherence and measure performance.
- Identify best and promising practices including, successful clinical workflows, member and staff education, outreach, and technical tips to improve *Controlling High Blood Pressure* rates.
- Provide an overview of Partnership HealthPlan of California's Medical Equipment Distribution Services and the Medi-Cal Rx blood pressure monitor program.

Overview of Hypertension

CT

- Clinical diagnosis of hypertension
- Importance of controlling high blood pressure
- Treatment options for achieving blood pressure control
- Examine disproportionate rates of hypertension control rates and how culture and lifestyle factors may contribute to ineffective management
- PHC benefits to support blood pressure control

Epidemiology

- Affects ~50 million people in the U.S.
- The most common reason for office visits in the U.S.
- About 50% of people with hypertension are not at adequate control of their blood pressure

Types

- Primary – the most common form of hypertension
 - Without a source or associated with any other disease
- Secondary
 - Associated with another disease such as kidney disease

Blood Pressure Targets

CT

Blood Pressure Levels

The Seventh Report of the Joint National Committee on Prevention, Detection, Evaluation, and Treatment of High Blood Pressure (2003 Guideline)²

The American College of Cardiology/American Heart Association Guideline for the Prevention, Detection, Evaluation, and Management of High Blood Pressure in Adults (2017 Guideline)¹

Normal

Systolic less than 120 mm Hg
diastolic: less than 80 mm Hg

Normal

Systolic less than 120 mm Hg diastolic: less than 80 mm Hg

At risk
(prehypertension)

Systolic 120 - 139

Elevated

systolic: 120–129 mm Hg
diastolic: less than 80 mm Hg

High Blood Pressure
(hypertension)

systolic: 140 mm Hg or higher
diastolic: 90 mm Hg or higher

High blood pressure
(hypertension)

systolic: 130 mm Hg or higher
diastolic: 80 mm Hg or higher

Center for Disease Control and Prevention

Hypertension

Sustained High Blood Pressure

CT

- 
- The force from high blood pressure causes the heart to work harder to pump blood to the body
 - When the force of blood flow stays high, the tissue around the arteries stretch
 - Stretching weakens the blood vessels making them prone to rupture
 - High pressure damages blood vessels and allows fat and cholesterol to build up, causing plaques
 - Plaques break off and cause heart attacks and strokes

Hypertension - A Silent Killer

CT

Hypertension can cause:

Brain

- Stroke
- Dementia

Arteries

- Artery damage and narrowing
- Aneurysm
- Leg amputation

Heart

- Coronary artery disease
- Heart attack
- Congestive heart failure

Kidneys

- Kidney failure
- Kidney artery aneurysm

cdc.gov/globalhealth/healthprotection

Factors that Contribute to Hypertension

CT

Age

- Hypertension rates increase in older populations

Race – Black Populations

- Hypertension is more common, more severe and occurs at younger age
- More impact overall and more end organ disease

Family History

- Individuals with one or two parents with hypertension carry twice the risk

Environmental or Behavioral Factors

- Obesity
- Inactivity
- Caffeine
- Tobacco use
- Alcohol
- Medications
- High sodium diet

Less Common Factors

- Kidney anatomy
- Genetic conditions

Controlling Blood Pressure ~ Rates by Region PHC QIP MY2022

SE

Race and Ethnicity Trends by County

CT

- The PHC Northeast Region has the lowest rates of blood pressure control
 - The “other” category represents the lowest rate which may speak to the need to better capture race/ethnicity data moving forward
- Poorer control in the Northern rural/frontier counties vs. Southern Region with a combination of rural and urban communities

Medications that Can Raise Blood Pressure

CT

Common medications that can increase blood pressure:

- Corticosteroids
- NSAIDs
- Combined oral contraceptive pills
- Select antidepressant medications (TCAs, SNRIs)
- Decongestants (pseudoephedrine)
- Stimulants (ADHD, weight loss medications)

Hypertension Treatment: More than Medications

CT

Lifestyle Changes for Prevention and Treatment

- Diet changes
- Regular physical activity and exercise
- Regular primary care provider (PCP) consults to address modifiable risk factors, early detection, and initiation of treatment

Home Self Monitoring

- Self-monitoring empowers patients for self-management

Medication Management

- Next slides

Nutrition Education and Counselling

CT

- Provided by Registered Dietician (RD) or Certified Diabetes Educators (CDE)
 - Offers dietary recommendations to control BP and limits impact of hypertension by controlling other potential risk factors
- Individual or Group Visits
 - PHC benefit no RAF required
- Covered PHC Benefit for Adult and Pediatric Patients with Diagnosis of
 - Hypertension, hyperlipidemia
 - Cardiovascular disease or CVD risk
 - Diabetes/prediabetes
 - Chronic renal disease
 - Eating disorders, undernutrition or risk of dietary deficiency
 - Overweight and obesity by BMI

PHC Policy MCUP 3052 Medical Nutrition Services

Improves patient engagement in self management

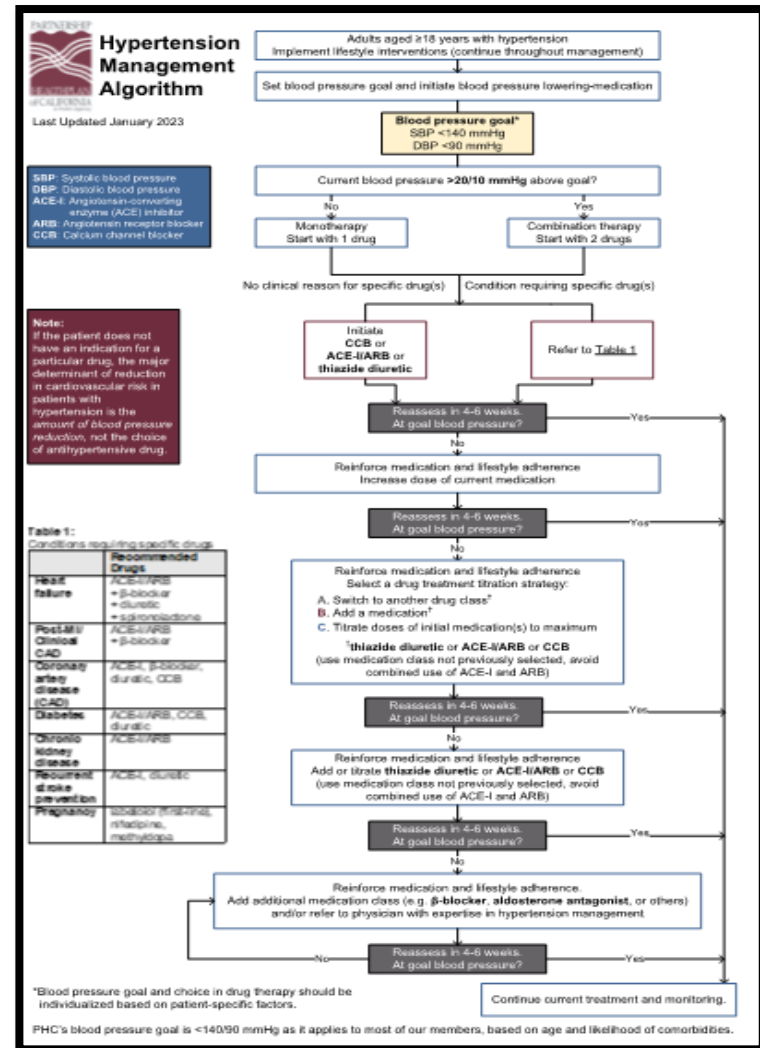

- PHC Medical Equipment Distribution Services Program
 - PCPs order a blood pressure monitor to be sent to their PHC patient.
 - Includes BP digital monitor, cuffs, user instructions in the member's preferred language.
 - How to request:
 - Request form and guidelines are available through PHC's Provider Resources section at partnershiphp.org
 - Providers can send request form via
 - Secure email to request@partnershiphp.org or
 - Secure fax to (707) 420-7855

RX and Workflow Resources

KV

- Hypertension management algorithm
- Medi-Cal Rx Contract Drugs List: Oral medications for treatment of hypertension
- Please refer to:
Medi-Cal Rx Contract Drugs List – Therapeutic Classifications for full list of covered legend drugs

<https://medi-calrx.dhcs.ca.gov/home/cdl/>

Academic Detailing

Pharmacy claims data and analysis

- Provide pharmacy claims data that clinics may not have
- Provide actionable data analysis:
 - Identify discrepancies between prescription fill records in EMR vs what is actually filled at the pharmacy.
 - Identify gaps in medication adherence (90-days supply or use of single-pill combo).
 - Identify suboptimal therapy (dose increase or addition of another therapeutic class) to help patient reach treatment goal.

Academic Detailing

Example of Pivot table created from Pharmacy Claims Data:

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Day Supply Total
Patient #1			30						60				90
HYDROCHLOROTHIAZIDE			30						30				60
25 MG			30						30				60
LISINOPRIL									30				30
20 MG									30				30
Patient #2			90			90			90			90	360
LOSARTAN POTASSIUM			90			90			90			90	360
25 MG			90			90			90			90	360

Patient not at goal (BP >140/90). PHI information removed.

PHC's Quality Incentive Program

50th% 55.35
25th% 50.61
below 25th%

Measure Description

The percentage of members 18 - 85 years of age who had a diagnosis of hypertension (HTN) and whose blood pressure (BP) was adequately controlled ($<140/90$ mm Hg) during the measurement year.

- **Denominator:** Members 18 - 85 years of age by December 31, 2023, who had at least two visits on different dates of service on or between 1/1/2022-6/30/2023 with a diagnosis of hypertension.
- **Numerator:** The number of members whose most recent blood pressure (BP) was adequately controlled ($<140/90$) during the measurement year.

2023 PCP QIP

KR

Controlling High Blood Pressure

PCP QIP 2023	Practice Type	Total Points	Threshold	Percentile
Full Points	Family Medicine	6 points	65.10%	75 th
	Internal Medicine	10 points		
Partial Points	Family Medicine	4 points	59.85%	50 th
	Internal Medicine	8 points		

Relative Improvement

- A site's performance on a measure must meet the 50th percentile target in order to be eligible for IR points on the measure **AND**
- Have an RI score of 10% or higher, ending up thereby achieving performance equal to or exceeding between the 50th percentile and not exceeding the 75th percentile, to earn full points.

Please note: If a provider site was not eligible for payment for a specific measure in the previous measurement year, the site is not eligible for earning points through the relative improvement in the current measurement year.

QIP Compliant Documentation

A second diagnosis of hypertension must occur prior to counting the most recent BP reading.

- Eligible readings include:
 - Outpatient visit
 - Telephone visit
 - E-visit or virtual check-in
 - Remote monitoring taken by any **digital device**
- Identify the lowest systolic and lowest diastolic BP reading from the most recent BP notation.
- Multiple readings for a single date – use the lowest systolic and lowest diastolic BP.

Example: BP reading on 5/30/20 were 140/**80**, 138/90 and **130**/87

 Use **130/80**

Compliant Documentation (continued)

BP readings taken on the same day as a low-intensity or preventive procedure are eligible for use.

Examples: *(list is not exhaustive)*

- Vaccinations
- Injections (i.e., allergy, insulin, steroid, etc.)
- TB test
- IUD insertion
- Eye exam with dilating agents
- Wart or mole removal

PHC will accept BP readings recorded at a dental office provided the EHR systems are integrated.

The following BP readings **do not** meet the measure:

- Acute inpatient stay or ED visit
- Taken by the member using a non-digital device
- BP reading is $\geq 140/90$
- No BP/incomplete reading during the measurement year
- Documented Pulmonary HTN
- Taken the same day as a diagnostic test or therapeutic procedure that requires a change in diet or medication regiment **on or one day before** the day of the test or procedure. (Example: colonoscopy)

Controlling High Blood Pressure Measure Exclusions

Exclude from the eligible population members with evidence of the following during the measurement year:

- Evidence of end-stage renal disease, dialysis, nephrectomy, or kidney transplant or dialysis
- Pregnancy
- Hospitalization or skilled nursing facility, rehabilitation center, or long term acute care facility
- Palliative care or hospice
- Diagnosis of frailty and advanced illness

Questions

Best and Promising Practices

KR

- Strategies from a high-performing organization
- Promising practices to decrease high blood pressure rates

Voices from the Field

KR

Mendocino
Coast Clinics

Tracy LeGris, Quality Improvement Manager
Mendocino Coast Clinic

Approaches for Blood Pressure Control

- MA training/ competence testing for B/P
- Protocol for 3 B/P's for all patients with hypertension
- MA follow up – out reach for patients with uncontrolled HTN
- “Missed opportunities” pushed out by QI staff to all MA's weekly

Key Points

- Making hypertension control a system priority
- Implement a policy or process to address BP with *every patient* with HTN at *every visit*
- Complete regular trainings for clinical support teams on BP collection best practices (including repeat BP readings within an appointment)
 - Measure BP at **each** visit and repeat if out of the normal range
 - Perform a manual BP Measurement if elevated after second measurement
 - Assign and train a designated medical assistant to perform manual BP checks

BP Measurement Workflows

- Schedule BP short term follow-up appointment in real time to reassess after treatment changes
- Use a defined process for outreach (e.g., via phone, mail, email, text message) to patients with uncontrolled high blood pressure and those otherwise needing follow-up
- Establish a self-measured BP monitoring program (see resource section)
- Provide patient educational materials as part of your workflow (language availability, see resources)

Practice Workflows

- Reassess BP every three months after target is achieved
 - Follow-up on no shows
 - Run registry of patients with hypertension to ensure follow up
- Establish standardized processes in your practice site (see A Million Hearts Action Guide in resource section)
 - Use of multidisciplinary team members (RN, RD, Pharmacist)
 - Standing orders
 - Treatment algorithms
- Refer/enroll with chronic case management

Patient Education

- Provide education on the importance of BP control and the role of self monitoring (language availability, see resources)
 - Review steps and goals of BP management
- Reinforce the importance of smoking cessation, increased physical activity, low sodium diets, and medication management

Outreach

- Member outreach for routine follow up (phone call, text, email, member portal, post card/letter)
- Prepare patients before the office visit via pre-visit outreach

Claims Submission

- Submit claims encounter data with 90 days of service

Accelerated Learning Webinar Series

Target Audience: Clinicians, practice managers, quality improvement team, and staff who are responsible for participating and leading quality improvement efforts within their organization.

The Accelerated Learning Series offers Quality Improvement teams the opportunity to take the next step towards improving quality service and clinical outcomes around specific measures of care. These learning sessions will cover Partnership HealthPlan of California's Primary Care Provider Quality Incentive Program measures with a focus on direct application on best practices with examples from quality improvement teams who are doing the work.

Sessions will be offered during the lunch hour and will be approximately 60-90 minutes in length. CME/CEs will be offered for live attendance.

Planned sessions include:

- 03/15/23 - Diabetes Management - HbA1c Control
- 03/29/23 - Asthma Medication Ratio
- 04/25/23 - Early Cancer Detection: Cervical, Colorectal, Breast Cancer Screening

Register: http://www.partnershiphp.org/Providers/Quality/Pages/Quality_Events.aspx

Contact: improvementacademy@partnershiphp.org

Upcoming Trainings

Mapping Your Way to Improvement: Using Process Maps to Chart the Patient Experience

Target Audience: Quality improvement staff, team leaders, managers, and front-line staff.

Presented by: The Health Alliance of Northern California (HANC) and North Coast Clinics Network (NCCN)

This webinar will continue to build skills in using lean thinking and tools to understand the patient experience and identify opportunities for improvement. The session will include overviews of different types of process mapping strategies including value stream mapping to support PDSAs and improvement projects.

Planned session: Thursday, March 2, 2023, noon – 1 p.m.

Register: http://www.partnershiphp.org/Providers/Quality/Pages/Quality_Events.aspx

Contact: improvementacademy@partnershiphp.org

Specifications & Measure Best Practices

A screenshot of the Partnership HealthPlan of California website. The top navigation bar includes links for Members, Уастники, Myembro, Member Portal, Language Assistance, Provider Online Services, Careers, and Contact Us. The main header features the Partnership HealthPlan of California logo and a search bar. Below the header is a blue navigation bar with links for HOME, MEMBERS, PROVIDERS, ABOUT US, and COMMUNITY. The breadcrumb trail reads: Home | Providers | Quality Improvement | Measure Best Practices. The left sidebar contains a menu with categories: PROVIDER RELATIONS, CLAIMS, PHARMACY, and QUALITY IMPROVEMENT. Under QUALITY IMPROVEMENT, there is a list of items including ECM QIP, PCP QIP, Hospital QIP, LTC QIP, Palliative Care QIP, Perinatal QIP, HEDIS, Managing Pain Safely, Partnership Improvement Academy, Patient Safety and Quality Assurance, and Potential Quality Issues. The main content area has a heading "MEASURE BEST PRACTICES" and a paragraph explaining that the 2023 Measure Best Practices documents are resources for the Primary Care Provider Quality Improvement Program (PCP QIP) measure set, which aligns closely with the Managed Care Accountability Set (MCAS) measures for which Partnership HealthPlan of California (PHC) is held accountable by the Department of Health Care Services (DHCS). Each Measure Best Practice document includes PHC tools and resources, guidelines to facilitate optimal member care, opportunities for patient education, outreach, and equity, data and coding resources, and helpful links to improve measure performance. Below this paragraph is a list of measures: Asthma Medication Ratio, Breast Cancer Screening, Cervical Cancer Screening, Child & Adolescent Well Care, Childhood Immunizations Status, Colorectal Cancer Screening, Controlling Blood Pressure, Comprehensive Diabetes Care, Immunizations for Adolescents, Unit of Service Blood Lead Screening, Unit of Service Dental Flouride Varnish, and Well Child Visits 15 Months.

Summary of 2023 QIP

UNIT OF SERVICE - ALL PRACTICE TYPES	
Measure	Criteria
Advance Care Planning	Minimum 1/1000 th (0.001%) of the sites assigned monthly membership 18 years and older for: <ul style="list-style-type: none"> \$100 per Attestation, maximum payment \$10,000. \$100 per Advance Directive/POLST, maximum payment \$10,000
Extended Office Hours	Quarterly 10% of capitation for PCP sites must be open for extended office hours the entire quarter an additional 8 hours per week or more beyond the normal business hours (reference measure specification).
PCMH Certification	\$1000 yearly for achieving or maintaining PCMH accreditation.
Peer-led Self-Management Support Groups	\$1000 per group, either new or existing. (Maximum of 10 groups per parent organization).
Health Information Exchange	One time \$3000 incentive for signing on with a local or regional health information exchange; Annual \$1500 incentive for showing continued participation with a local or regional health information exchange. This incentive is available at the parent organization level.
Health Equity	\$2000 per parent organization for submission of a report of their implementation of their Health Equity initiative.
Blood Lead Screening	Tier 1-3, \$1000, \$3000, \$5000 per parent organization for the number of children between 24 to 72 months who had capillary or venous lead blood test for lead poisoning.
Dental Varnish	\$1000 per parent organization for submission of proposed plan to implement fluoride varnish application in the medical office.
Tobacco Screening	\$5.00 per tobacco use screening or counseling of members 11-21 years of age after 3% threshold of assigned members screened.
Electronic Clinical Data System (ECDS)	\$5,000 per parent organization for participating in Electronic Clinical Data System (ECDS) implementation by the end of the measurement year. For parent organizations that submitted initial data for ECDS in prior year, they are also eligible for the \$5000 incentive if they continue to submit an ECDS file for 2023 data monthly, starting no later than Jun of 2023.

Rev. 01042023

Medi-Cal Rx Contract Drugs List: Oral Medications for Treatment of Hypertension

Oral antihypertensive drugs covered by Medi-Cal

Drug Class	Generic Name		
ACE-I	benazepril captopril	enalapril lisinopril	ramipril
ARB	irbesartan losartan	telmisartan	valsartan
CCB (dihydropyridine)	amlodipine isradipine	nicardipine nifedipine (long-acting)	nisoldipine
thiazide & related diuretics	chlorthalidone	hydrochlorothiazide	indapamide
β-blocker <i>*preferred in the treatment of heart failure</i>	acebutolol atenolol bisoprolol* carvedilol*	labetalol metoprolol succinate* metoprolol tartrate	pindolol propranolol timolol
α2-adrenergic agonist	doxazosin	prazosin	terazosin
centrally-acting agent	clonidine	guanfacine	methyldopa
vasodilator	hydralazine		
loop diuretic	furosemide		
potassium-sparing diuretic	spironolactone		

Medi-Cal Rx Contract Drugs List: Oral Medications for Treatment of Hypertension

Oral antihypertensive combination products covered by Medi-Cal

Drug Class	Generic Name
ACE-I – thiazide diuretic	benazepril – hydrochlorothiazide
	lisinopril – hydrochlorothiazide
ARB – thiazide diuretic	losartan – hydrochlorothiazide
	telmisartan – hydrochlorothiazide
	valsartan – hydrochlorothiazide
CCB – ACE-I CCB – ARB	amlodipine – benazepril
	amlodipine – valsartan
CCB – ARB – thiazide diuretic	amlodipine – valsartan – hydrochlorothiazide
centrally-acting agent – thiazide diuretic	methyldopa – hydrochlorothiazide
diuretic combinations	spironolactone - hydrochlorothiazide
	triamterene – hydrochlorothiazide

List provided does not include all covered legend drugs used for treatment of hypertension. Legend drugs not listed may be covered subject to authorization from a Medi-Cal consultant.

Please refer to Medi-Cal Rx Contract Drugs List – Therapeutic Classifications for full list of covered legend drugs.

Factors for Implementing SMBP

Distribution of Tasks

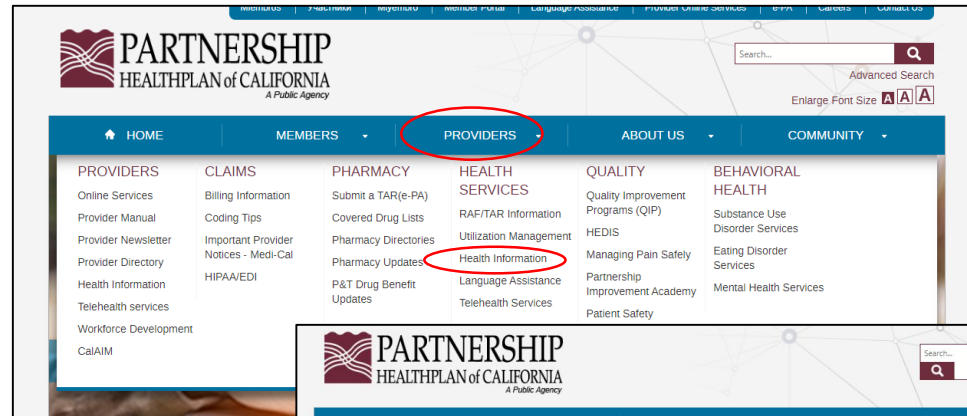

Diagram 4: SMBP Essential and Optional Tasks by Role

Must Be Done by a Licensed Clinician	Can Be Done by a Non-licensed Person (e.g., medical assistant, local public health department, community health organization, community health workers)	Must Be Done by Patient
<ol style="list-style-type: none"> 1. Diagnose hypertension 2. Prescribe medication(s) 3. Provide SMBP measurement protocol 4. Interpret patient-generated SMBP readings 5. Provide medication titration advice 6. Provide lifestyle modification recommendations 	<ol style="list-style-type: none"> 1. Provide guidance on home blood pressure (BP) monitor selection 2. If needed, provide home BP monitor (free or loaned) 3. Provide training on using a home BP monitor 4. Validate home BP monitor against a more robust machine 5. Provide training on capturing and relaying home BP values to care team (e.g., via device memory, patient portal, app, log) 6. Reinforce clinician-directed SMBP measurement protocol 7. Provide outreach support to patients using SMBP 8. Share medication adherence strategies 9. Provide lifestyle modification education 	<ol style="list-style-type: none"> 1. Take SMBP measurements 2. Take medications as prescribed 3. Make recommended lifestyle modifications 4. Convey SMBP measurements to care team 5. Convey side effects to care team

Optional Tasks – Can be Done by a Non-licensed Person
<ol style="list-style-type: none"> 1. Reinforce training on using a home BP monitor 2. Reinforce training on capturing and relaying home BP values to care team (e.g., via device memory, patient portal, app, log)

Health Education

- Provider health education materials are accessible on PHC's website partnershiphp.org

Health Education Example

Controlling Your High Blood Pressure

What is High Blood Pressure?
Blood pressure is the force of blood against the inner walls of blood vessels. If your blood pressure is too high, it can damage your blood vessels and even organs. If not controlled, high blood pressure can lead to:

- Heart failure
- Heart attack
- Stroke
- Kidney failure

How Can I Control My Blood Pressure?
Controlling high blood pressure starts with lifestyle changes.

- You can better manage your blood pressure by changing the foods you eat:
 - Reduce salt in your diet.
 - Eat lots of fruits and vegetables.
 - Reduce trans fats and saturated fats. These are fats found in fried foods, snack foods, and fast foods.
- You can make other lifestyle changes such as:
 - Exercising at least 30 minutes per day. Three 10-minute walks count!
 - Keeping a healthy diet and exercising can help you lose weight. Losing even a small amount of weight helps.
 - Keeping your number of alcoholic drinks to one or two drinks a day.
 - Quitting smoking. Talk to your doctor or pharmacist about how they can help you quit.
 - Getting good sleep.

Controlling Your High Blood Pressure | Partnership HealthPlan of California

Tips for Managing Your Blood Pressure Medicine
Take your blood pressure medicine the way your doctor or pharmacist explained it.

- Understand all the medicines you take, when you need to take them and how much to take.
- Take your medicines at the same time every day.
- Call your doctor if you have questions about your medicine.

Make a daily routine.

- Link your medicines to a daily activity such as brushing your teeth or when you eat.
- Keep your medicines where you can see them.
- Use a pillbox or detailed medicine list with directions.
- Use reminders like a calendar, alarm or smartphone app.

Talk to your doctor.

- Bring your medicine bottle(s), or full medicine list, to every doctor's visit.
- Don't stop taking your medicines without talking to your doctor. When you have high blood pressure, you usually don't feel sick. Taking the medicine may not make you feel any better. But just because you don't feel it working, doesn't mean the medicine isn't doing its job.

Talk to your pharmacist.

- Talk to your pharmacist if your doctor changes your prescription.
- Refill all your medicines at the same time to save time.

Partnership HealthPlan of California and your doctor are here to help keep you healthy! Your doctor's phone number is on the front of your Partnership HealthPlan ID card.

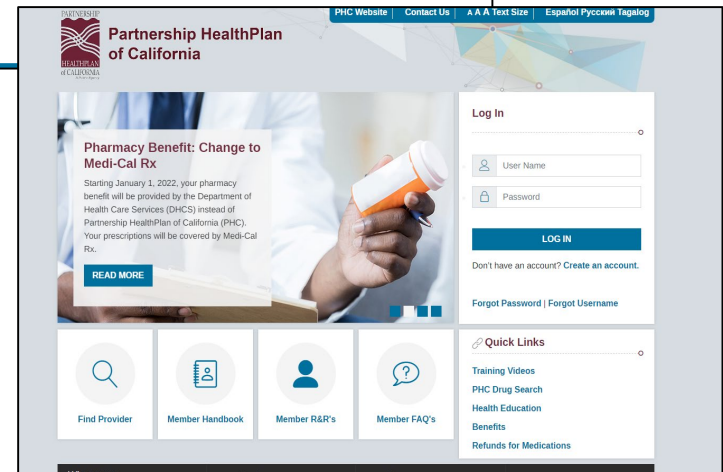

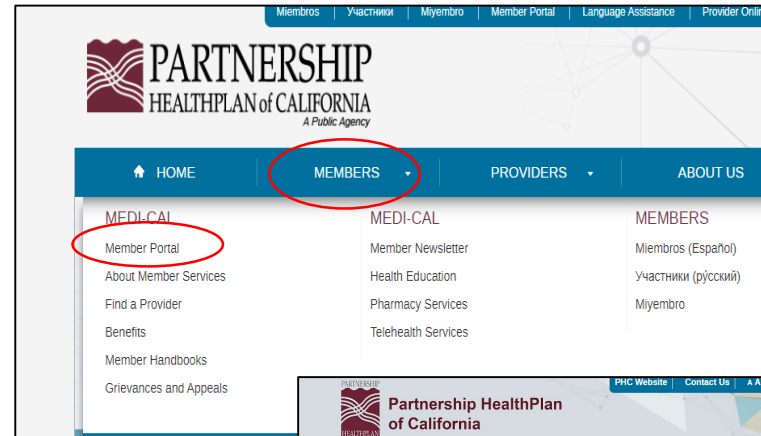

If you need help scheduling a doctor visit, call PHC at (800) 863-4155. TTY users can call California Relay Service at (800) 735-2929 or 711.

Healthy Living Tool

HO

- Members can access the healthy living tool through the member portal.
- Members can call Population Health at (855) 798-8764 if they need help.

Provider Language Assistance

- Provider language assistance materials are also accessible on PHC's website, partnershiphp.org

The screenshot shows the Partnership HealthPlan of California website. The 'PROVIDERS' menu is highlighted, and the 'Language Assistance' link is circled. Below, the 'PROVIDERS LANGUAGE ASSISTANCE' page is shown, featuring sections for 'Provider Health Information Tools - Training - Webinars', 'Cultural Competency Training for Healthcare Providers and Staff', and 'Culturally Competent Care (CME)'. The 'Provider Tool Kit' link is also circled.

Education Materials

Systolic (upper number)		Diastolic (lower number)	Take Action	Follow-up	My Blood Pressure Plan
Lower than 90	or	Lower than 60	Do not take your blood pressure (BP) medicine.	Call your PCP today.	
90-139	and	60-89	Take your medicines as directed.	Continue checking your BP weekly.	
140-179	or	90-110	If you have not taken your BP medicines, take them now. Wait 1 hour and recheck your BP.	Recheck BP later today Check your BP daily	
180-199	and/or	Higher than 110	If you have not taken your BP medicines, take now. Wait 1 hour and recheck your BP.	If your BP is high 1 hour after taking BP medicine, call the advice nurse or your PCP.	
200	and/or	Higher than 120	Call advice nurse or your PCP.		

Home Blood Pressure Cuffs How to Submit Requests

- Providers can submit requests to PHC:
 - Via secure email to: request@partnershiphp.org
 - By secure fax to: (707) 420-7855
- The request form and guidelines are available through:
 - PHC's Provider Resources page on our website
 - <http://www.partnershiphp.org/Providers/Medi-Cal/Pages/default.aspx>
- Contact request@partnershiphp.org for any questions

SECTION 2: MEMBER INFORMATION

Member Name:	First Name	Last Name
PHC Member ID / CIN:	Phone:	
Member DOB:		
Member Email:	A follow-up survey will be sent to the member. Mark "N/A" if not available or "decline" if member declines.	
Member Language Preference:	<input type="checkbox"/> English <input type="checkbox"/> Spanish <input type="checkbox"/> Russian <input type="checkbox"/> Tagalog <input type="checkbox"/> Other, please specify:	
Mailing Address		
Important Note: If the device should be sent to the provider office/clinic, please designate provider mailing address and indicate "Attention To" name. PLEASE CONFIRM that this address is current and up to date.		
Number and Street Name (No PO Boxes)	City and State	Zip Code
Attn To:		

SECTION 1: EQUIPMENT REQUEST

General Guidelines:

- Members must go through their PCP.
- If the patient has questions, please email instructions with the item, when delivery is expected.
- If the PCP suspects an equipment need, send an email to request@partnershiphp.org or call (707) 420-7855. Do not reach out directly to PHC. They will interpret the numbers (i.e. when to call).
- Establish regular virtual check-ins (per the data they are collecting, and to ensure such visits would be determined by PCP).
- I acknowledge that I have read and understand the general guidelines.

Select One: ☐ FQHC ☐ RHC

Provider Name: _____

Office Name: _____

Office Contact: _____

Requestor/Provider Email: _____

Date of Request: _____

MEDICAL EQUIPMENT DISTRIBUTION SERVICES REQUEST FORM

Note: Requests will not be processed unless all sections are completed in full. Incomplete requests will be returned and may result in a delay.

Instructions:

- Download and save this form to your PC.
- Select the type of medical equipment needed and mark the appropriate reason/s for request.
- Complete the member and provider information section.
- Submit this form to request@partnershiphp.org or fax the form to (707) 420-7855.

Please note that Urgent Delivery is available for certain requests. All other items are shipped via Routine Delivery, Certified U.S. Mail (i.e. 2-3 days).

<input type="checkbox"/> Fingertip Pulse Oximeter, Model #F02T or Contec Pulse Oximeter, Model# CM55001 I confirm that the patient is age 3 and older and has been diagnosed with the following (select all that apply):	<input type="checkbox"/> Recurrent Pulmonary Embolism <input type="checkbox"/> Auto-Immune Lung Disease <input type="checkbox"/> Interstitial Lung Disease <input type="checkbox"/> Other - please note below:
<input type="checkbox"/> COVID: Home Treatment, Confirmed or Suspected to Follow For Decompensation (Urgent Delivery - Next Day) <input type="checkbox"/> Chronic Lung Or Heart Conditions To Avoid Office Visits <input type="checkbox"/> Patient is On Home Oxygen Therapy/ Home Mechanical Ventilation <input type="checkbox"/> COPD <input type="checkbox"/> Cystic Fibrosis <input type="checkbox"/> Asthma <input type="checkbox"/> Congestive Heart Failure (CHF) <input type="checkbox"/> Pulmonary Hypertension	<input type="checkbox"/> Vive Precision Blood Pressure Monitor, DMD1001 with Adult Medium Size Cuff (arm circumference 27-34 cm) I confirm that the patient is age 6 or older and has been diagnosed with the following (select all that apply):
<input type="checkbox"/> COVID: Home Treatment, confirmed or suspected to follow for decompensation <input type="checkbox"/> Chronic heart conditions to avoid office visits <input type="checkbox"/> Hypertension, includes pregnancy induced hypertension <input type="checkbox"/> Preeclampsia/History of Eclampsia <input type="checkbox"/> Diabetes mellitus (any type) <input type="checkbox"/> Coronary Artery Disease/Peripheral Vascular Disease <input type="checkbox"/> History of Stroke	<input type="checkbox"/> Atrial Fibrillation <input type="checkbox"/> Congestive Heart Failure (CHF) <input type="checkbox"/> End Stage Renal Disease (ESRD) <input type="checkbox"/> Pregnancy (for duration of COVID emergency) <input type="checkbox"/> Other - please note on form

Alternative Equipment needed:

☐ **Talking BP Monitor** (For low vision member)

*If Other Cuff Size Needed: Indicate Size:

☐ **Small** (Arm circumference 15-24 cm)

☐ **Large** (Arm circumference 35-44 cm)

☐ **Extra-Large** (Arm circumference 42-48 cm)
